

KALYANI GOVERNMENT ENGINEERING COLLEGE

ROBOTICS SOCIETY

Presents

OFFLINE | 24-HOURS HACKATHON

KGEC CAMPUS , KALYANI

30th-31st MAY

" SUSTAINABLE FUTURE WITH ROBOTICS "

POWERED BY

ABOUT KGEC

Kalyani Government Engineering College (KGEC) was established by the Govt. of West Bengal in 1995. The college is affiliated with Maulana Abul Kalam Azad University of Technology (formerly WBUT), Kolkata, West Bengal. KGEC is among the top engineering colleges of West Bengal and one of the finest engineering institutes in the country. It is a community of learners, striving to educate the mind, nurture the spirit and foster the development of the whole individual.

Kalyani Government Engineering College has a beautiful, lush green & pollution free campus spanning over 75 acres. The campus is well connected, be it the Kolkata International Airport or Sealdah and Howrah Railway Stations. Intercity Bus Terminus at Kolkata is within a radius of about 70km from the campus and accessible by the modern express way.

ABOUT ZYRO

ZYRO 2026 is a 24-hour offline, hardware-based robotics hackathon focused on building real-world, impact-driven robotic systems aligned with the theme:

“Sustainable Future with Robotics”

This is not a software-only hackathon.

Participants must design and build hardware-integrated solutions involving electronics, microcontrollers, sensors, automation systems, AI integration and physical prototypes.

What Makes ZYRO 2026 Different?

What makes ZYRO 2026 different is its strong focus on real, hands-on hardware innovation. Unlike typical hackathons that stay limited to software or presentations, ZYRO requires teams to design and build a working robotic prototype within 24 hours.

Participants must integrate electronics, sensors, microcontrollers, mechanical systems and intelligent control into a functional solution aligned with the theme “Sustainable Future with Robotics.”

REGISTRATION FEE

₹ 0/- (FREE)

PRIZE POOL

WORTH ₹1,00,000/-

(CASH PRIZES + GOODIES)

WHY PARTICIPATE?

For Hardware Enthusiasts:

Get a rare hands-on opportunity to design and build real embedded and robotic systems within a fast-paced 24-hour challenge. Perfect for those who love working with actual hardware.

For AI/ML & Electronics Learners:

Take your knowledge beyond theory by deploying intelligent solutions on real devices. Learn how to integrate AI/ML with sensors, microcontrollers and automation systems.

For First-Year Students:

Special consideration is given to promising early-stage builders. It's a great platform to learn quickly, gain exposure and showcase your potential from the very start.

For Everyone:

Build something that truly works, not just slides or simulations. ZYRO is about creating real, functional systems that solve meaningful problems.

PROBLEM TRACKS

Smart Healthcare

Robotics or hardware solutions that enhance healthcare delivery, patient monitoring or medical assistance.

01

Climate Tech

Innovative technologies designed to address climate challenges such as pollution monitoring, waste management or environmental protection.

02

Smart Agriculture

Technologies that improve farming efficiency through automation, monitoring systems and smart irrigation.

03

Green Energy Automation

Automation and robotics solutions focused on renewable energy systems, energy efficiency and smart power management.

04

Sustainable Development

Robotic or automated solutions that promote environmentally responsible and sustainable practices.

05

Robotics for Public Infrastructure

Robotic systems that support infrastructure development, maintenance, transportation or smart city applications.

06

07

Open Innovation

Creative robotics solutions addressing real-world problems beyond the defined themes.

REGISTRATION & PRELIMINARY ROUND

All teams must register through the official registration link!

Registration Link: <https://www.namespace.world/draft-events/256WHF> [Deadline: 11:59 p.m. on 07/05/2026]

Online Idea Submission :

- Teams must submit their innovative project ideas through the official online portal before the deadline.
- Shortlisted teams will be notified via email and invited to participate in the offline hackathon round.

Online Screening Round :

A preliminary Online Screening Round will be conducted based on Basic Knowledge in domains like :

- Electronics Fundamentals
- Microcontrollers
- Basics of Arduino Programming
- Basics of AI/ML Concepts
- Mechatronics Fundamentals (select questions)

ROUND 1: IDEA SUBMISSION

Submission Window: Mid-March - 9th May

Teams must submit their idea proposal in PPT / PDF format through the official submission form.

The proposal should briefly include:

- Problem Statement
- Proposed Solution
- Hardware Components Required
- Technology Stack
- Feasibility of Implementation
- Sustainability / Real-World Impact

Submit your idea:

<https://luma.com/k7nc6p8t>

Shortlisted teams will be invited to participate in the 24-hour offline hackathon.

ROUND 2: ONLINE SCREENING

Date: 10th May

Contest Window: 6:00 AM - 12:00 PM

Duration per Participant: 90 Minutes

Participants need to take part in an online screening test consisting of multiple-choice questions to evaluate their technical knowledge and problem-solving skills.

Test Details:

- Total Questions: 50 MCQs
- No Negative Marking
- Individual participation required from all registered team members

Difficulty level: Basic to Moderate, focused on conceptual clarity and applied fundamentals.

Teams will be shortlisted based on their performance for the final 24-hour offline hackathon round.

EVENT TIMELINE

HACKATHON TIMELINE

PHASE 1 : CHECK IN AND ORIENTATION

- Reporting Time: 10:00 AM
- Team verification and briefing

PHASE 2: HACKATHON KICKS OFF

- Teams start building their solutions on-site.
- Mentors will be available throughout the event for necessary guidance

PHASE 3 : PROTOTYPE DEMONSTRATION

Each team must present:

- Working prototype (hardware/software)
- Explanation of approach
- Impact and scalability

PHASE 4 : EVALUATION & PRIZE DISTRIBUTION

- Projects will be evaluated by an expert jury based on innovation, technical implementation, impact and presentation
- exciting prizes, goodies and certificates will be awarded to the top teams

ELIGIBILITY CRITERIA

- The hackathon is open to students and alumni from all UGC recognized colleges and universities.
- Participants may register individually or in teams of up to 4 members.
- Cross-disciplinary teams consisting of members from different domains (electronics, mechanical, computer science, etc.) are encouraged.
- All participants must carry a valid college ID and government-issued ID for verification during the event.
- Team composition must remain the same after registration and cannot be modified once the teams are finalized.
- Each participant is allowed to register in only one team.
- Participants must be physically present at the venue for the offline hackathon.
- All participants must complete the official registration process before the deadline to be considered.

EVALUATION CRITERIA

PHASE 1(ONLINE):

Teams will be evaluated based on the following parameters:

- MCQ Score (Best individual score of the team) - 50%
- Idea Evaluation - 40%
- LinkedIn / Coding Profile - 10%

PHASE 2 (OFFLINE):

Teams will be evaluated based on the following parameters:

- Innovation & Originality
- Technical Implementation
- Hardware Integration Quality
- Sustainability Impact
- Execution within 24 Hours
- Presentation & Clarity

Judges' decision will be final and binding.

MENTORSHIP

Mentors will be assigned across domains such as:

- Robotics & Embedded Systems
- Mechanical Design
- Energy & Sustainability
- Problem Validation
- AI-MI & IoT

Mentor suggestions are advisory and final implementation decisions rest with the teams

RESOURCES & FACILITIES

- Charging ports / power supply
- Food and refreshments (as per schedule)
- Resting / accommodation facility for selected participants
- Mentorship support throughout the hackathon
- Teams must bring their own laptops, robotics kits, sensors, components, tools and extensions

AWARDS & RECOGNITION

For Top 3 Teams + Individual Track Winners

- Cash Prize - Exciting cash rewards for the winning teams.
- Certificate of Excellence - Special recognition for outstanding performance.
- Partner Goodies - Exclusive merchandise from our event partners.
- Free Subscriptions - Complimentary access to partner platforms and tools.
- Mentorship Opportunities - Guidance and support from experts at our sponsor companies.

Special Category Awards :

- Best Hardware Implementation
- Best Sustainable Solution
- Best First-Year Team

For All Finalists:

- Certificates - Official certificates recognizing you as a ZYRO Hackathon finalist.
- Partner Merchandise - Exclusive goodies from our event and community partners.
- Networking & Mentorship Access - Connect with industry experts and mentors for guidance and opportunities.

RULES AND REGULATIONS

GENERAL RULES

- This is a 24-hour continuous hackathon.
- Teams must work only within the allocated area.
- Any form of misconduct, plagiarism and/or rule violation will lead to disqualification.
- The organizers reserve the right to modify rules if necessary.

PROTOTYPE RULES

- The solution must be original and developed during the hackathon.
- Pre-built modules are allowed, but final integration must be done on-site.
- Internet usage is allowed unless stated otherwise.
- Every solution must involve physical hardware components .

SAFETY RULES

- Teams must follow basic electrical and mechanical safety norms.
- Any hazardous activity may result in immediate disqualification.
- Organizers are not responsible for any loss and/or damage of personal equipment.
